

CUCCIO-CDPIUC

CUCCIO-CDPIUC is the *Canadian University Council of CIOs - Conseil des dirigeants principaux de l'information des universités canadiennes*. It was established in 2006 to serve as the national voice for IT-related issues in Canadian universities and to provide a forum for members to share ideas, best practices and new technologies. We presently have [51 member universities](#) from all across the country.

Through CANHEIT and other forums our members keep abreast of new technologies and best practices, share information, accomplishments and ideas, and work with colleagues across the country in collaborative projects.
